

Direct Deposit

Info & Application

Why use direct deposit?

When an employer sends your pay directly to your checking or savings account rather than issuing you a paper check, you're participating in Direct Deposit. These deposits arrive and are made available to you more quickly, and can be automatically divided among different accounts based on your direction. Employers will issue a payment summary that shows your deductions for taxes, insurance and other obligations, and will reflect the balance that was deposited into your account.

Every year, paper checks use over 674 million gallons of fuel and add 3.6 million tons of CO₂ to the environment. Signing up for Direct Deposit will benefit the environment we all share. Direct Deposit has been around for almost 40 years. It has a proven record of success - 97% of people who get paid via Direct Deposit are satisfied with it.

Direct Deposit is simple.

Your money is automatically deposited into your account on time, every time – and you don't even have to be at work, or even in town!

Direct Deposit is safe.

Direct Deposit is confidential. Money is transferred electronically and passes through fewer hands than a check.

Almost 85% of identity theft starts with someone seeing your personal financial information on a paper check & billing or account statements. Once electronic payments are set up, the money travels electronically, greatly reducing the number of people who see your personal information.

Direct Deposit is smart.

Direct Deposit gives you access to your money earlier than check deposits – no waiting for checks to clear. It puts you in charge of your money. Financial planners recommend direct deposits as one step towards gaining control of your finances.
